### Please ensure

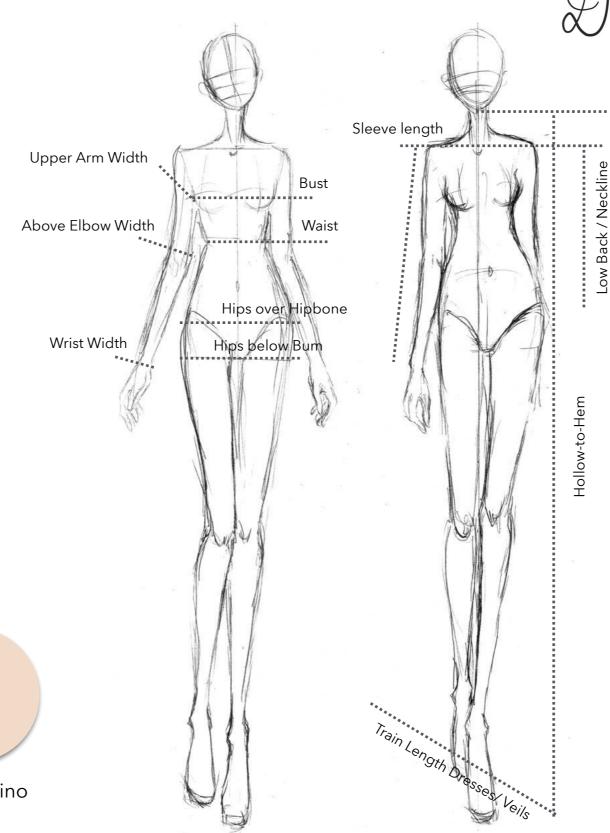

- to always order your bridal gown slightly larger, so you can have it properly fitted and taken in locally to sculpture the fit perfectly to your body shape before the wedding. We recommend to always choose the next size up to leave room for alterations during your bridal fitting locally.
- to measure Bust at the widest point including a bra (if necessary, please note that all our gowns come with a structured bodice and build in cups for extra comfort and support); Waist at the thinest point usually above belly button hight and Hips at the widest point across the hip bone.
